

Greetings Colleagues,

As the situation with COVID-19 continues to evolve, the college is monitoring all new developments and engaging in a number of preparatory activities for various potential scenarios.

As part of these efforts, COM IT has developed a resource assessment tool to help determine what technology is needed for faculty and staff to work remotely in the event of a university closure.

Your participation in this assessment is critical – please complete the survey as soon as possible.

(Link to survey in original message – contact COM IT for assistance if viewing this copy online.)

You may contact comhelpdesk@health.fau.edu with any questions.

Thank you!
