Schmidt College of Medicine Celebrates Match Day 2018

Today, March 16, medical students at Florida Atlantic University’s Charles E. Schmidt College of Medicine discovered where they will train as physicians once they graduate with their medical doctorate next month.

The Class of 2018 will begin residency training at top institutions including: Harvard/Massachusetts General Hospital in Boston, MA, Dartmouth-Hitchcock Medical Center in Lebanon, NH, Penn State Hershey Medical Center in Hershey, PA, Children’s National Medical Center in Washington, DC, Duke University Medical Center in Durham, NC, Emory University School of Medicine in Atlanta, GA and Icahn School of Medicine at Mount Sinai in New York, NY.

Residency training programs in Florida continue to attract our graduates, with 23 entering programs statewide, including University of Florida College of Medicine - Shands Hospital in Gainesville, University of Miami Miller School of Medicine at Jackson Memorial Hospital University of Miami Miller School of Medicine at Holy Cross, University of South Florida Morsani College of Medicine, Kendall Regional Medical Center in Miami, Orange Park Medical Center in Orange Park, University of Central Florida in Orlando, and the Charles E. Schmidt College of Medicine in Boca Raton.

In line with our College of Medicine’s mission, one third of the graduating class will enter primary care specialties. Highly competitive residency programs are also represented, including Urology, Anesthesiology, Dermatology, Neurology, Orthopaedics and Surgery specialties.

Match Day is celebrated around the nation as fourth-year medical students discover where they will spend the next one-to-seven years of their medical careers to become license-eligible physicians. The Match Day event is a highly anticipated and exciting time of year for graduating medical students who aspire to practice medicine in their chosen specialty after completing training in their preferred residency program.
